

# Lost in scientific literature?

## Too busy to stay on top of your field?

 Too few or too many results, having to search in numerous places - literature research can be time-consuming. Europe PMC provides free access to biomedical peer-reviewed publications and offers advanced search tools to help you navigate the world of scientific knowledge.

 Try Europe PMC for A-Z of life sciences literature: publications, patents, theses, and more. It combines the power of PubMed and PMC with a single search for both abstracts and full text.

 Even most specific requirements can be addressed with Europe PMC advanced search. Find clinical reviews, or search specifically for articles that mention CRISPR in the methods section.

 Find influential research with a click of a button. Get to highly cited articles, follow updates on new publications, browse grant database to see what is funded in your field.

## Hard to locate primary data and find evidence?

 Want to re-use a dataset from a study? Discover links to data records directly from the full text. Europe PMC links to PDBe, UniProt, ChEMBL, and many more public molecular resources.

 Looking for evidence to support your hypothesis? Scan articles for concepts like chemicals or organisms, and spot protein interactions or gene-disease relations with an annotation tool.

## No time to gather the evidence of your impact?

 Claim your works to your unique ORCID identifier with a simple tool from Europe PMC and enjoy immediate benefits - an Author Profile showcasing your publication list and citations.

## Find your way with Europe PMC!
